Incubation period

02-02-2015 to 30-04-2016

About Coovia

Coovia creates an interMobility network, linking the private cars to the public transport system in order to create a global transport system, faster and cheaper than the current public transport system. Space technology is at the heart of the system by enabling Coovia to use the ridesharing in real time, making it suitable for an everyday use so that you can save time and money on your daily commutes.
