

The ESA Business Incubation Centre in Darmstadt, Germany, was founded in 2007 and is managed by Centrum für Satellitennavigation Hessen (cesah). The centre offers business start-up support as well as technical expertise in different space related areas, and in particular in satellite navigation, data systems, software systems and navigation test environments.

## The challenge

Security solutions that use location awareness as an important component to analyse and monitor risks and weak spots in corporate networks, critical infrastructures and credit card and mobile payment systems are gaining more and more traction. IPAYMO is capitalising on its know-how and expertise in geo-localisation services by offering our

game changing GeoSecurity solutions as complementary means to significantly improve measures and methods protecting the operators of such systems.

## **The solution**

IPAYMO-GeoSecurity is the next step in our young history and the GeoSecurity project has evolved from our mobile payments and e-commerce solutions. These were the subject of the activities conducted during the incubation period at the ESA-BIC in Darmstadt.
