The challenge

It is the mission of the company to create a new way of feeling and exploring unknown environments, bridging the gap between the information available and the real travellers' demands and expectations. LatitudeN helps its clients to create innovative mobile

solutions which are able to project users' experience to the next level.

The solution

'Farol City Guides' is the brand name of an intelligent travel city guide for smart phones focused on the specific needs of short city-break visitors who often lack the time to prepare their trips. The guide provides fast and easily the most of what a city can offer within a short stay. Its unique profile estimation features and real-time adaptation makes this mobile application the perfect 'travel buddy' for business travellers with still some hours left after a meeting for sightseeing, and for tourists on a short weekend city-break trip.
