The challenge

Our self-developed system called IntraNav is precise, easily scalable, suitable for industrial use and robust. Besides a cm-accurate xyz coordinate, we offer our Industry4.0/IoT Platform which is tailored for industrial needs. Once the data is on the platform, any logical function can be created as well as historical data, statistics and

many more. IntraNav will be the most widely used platform for the navigation and localisation of objects in indoor areas. Our customers and partners are global players from different industries, who rely on our technology, agility and professionalism.

The solution

Highly Accurate & Low-Cost Indoor Localization System

Industry 4.0/IoT Platform
