

The ESA Business Incubation Centre in Darmstadt, Germany, was founded in 2007 and is managed by Centrum für Satellitennavigation Hessen (cesah). The centre offers business start-up support as well as technical expertise in different space related areas, and in particular in satellite navigation, data systems, software systems and navigation test environments.

## The challenge

Our initial focus will be on the autonomus vehicle space but our system is agnostic to the use case and as such, will fit into a great variety of application scenarios.

## **The solution**

ThingsOnAir is currently developing a GNSS navigation system that offers enhanced accuracy, high availability, and a unique set of configurable features relevant to many demanding navigational applications, such as UAV flight control.
