

ESA Business Incubation Centre in Noordwijk, The Netherlands, was opened in 2004 and is managed by SBIC Noordwijk B.V. The centre offers business start-up support as well as technical expertise in most areas of space technology and know-how. Located at the Space Business Park near to ESTEC, the largest ESA site and the scientific and technical heart of ESA, ESA BIC Noordwijk promotes the exchange of knowledge between advanced technology and space activities, as well as the exchange of technology and expertise between space programmes and terrestrial applications.

About Knowble

Knowble is developing a software which analyzes the latest news articles. It uses these data in combination with the learner's profile and is able to provide the optimal learning material for each learner's personal level.

The challenge

Language is still too complex to be fully analyzed by algorithms. At Knowble we believe in

advanced technology as the way to provide more effective education for each learner. This is why we are developing a tool which will be able to understand language well enough to be of high value to the learners.

The solution

We have been using increasing amounts of resources to improve the software's understanding of language. We are now looking to integrate high-quality dictionaries in order to improve the provided translations. Through the imminent launch of an innovative product (Chrome browser extension), we are planning to boost our sales and continue to further improve the quality of our technology.
