

ESA Business Incubation Centre in Noordwijk, The Netherlands, was opened in 2004 and is managed by SBIC Noordwijk B.V. The centre offers business start-up support as well as technical expertise in most areas of space technology and know-how. Located at the Space Business Park near to ESTEC, the largest ESA site and the scientific and technical heart of ESA, ESA BIC Noordwijk promotes the exchange of knowledge between advanced technology and space activities, as well as the exchange of technology and expertise between space programmes and terrestrial applications.

Orbital Eye

Orbital Eye offers solutions for safer transport of hazardous materials via transmission pipelines

About Orbital Eye

Orbital Eye's flagship product is PIMSyS. PIMSyS continuously monitors pipelines using radar satellites.

PIMSyS is a service for the detection of threats by third parties to the integrity of pipelines. Examples of such threats are: excavations, construction activities, city encroachment, etc.

PIMSyS can be used in the field by field technicians and in the office. PIMSyS also supports pipeline operators in the management of all third party events.

The challenge

To make the transport of hazardous materials via pipelines safer by preventing failures caused by third party events.

The solution

We deliver a service. Our service is 100% OPEX based. We integrate our service in the business processes of pipeline operators.

Orbital Eye delivers a service for the detection of threats by third parties
