

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

## About DEOS Consultancy

DEOS Consultancy was founded in 2015 by an experienced Radiographer with one aim - to change the way that mobile cancer screening vans work for the better. When the National Breast Screening Service started in 1988 the targeted turnaround time for a woman to receive her result was 14 days from being screened. Nearly 30 years later it is still 14 days.

DEOS Consultancy is changing this situation.
