

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

Energeo

Energeo provides geospatially intelligent solutions for renewable & sustainable energy applications.

About Energeo

Through the innovative exploitation of digital mapping and remotely sensed earth observation data (such as satellite imagery) Energeo provides clients with unique insights into existing energy performance and future sustainable energy potential - whether individual sites or national-level analysis.
