

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

## About MIRICO

MIRICO's first product is a highly novel stable isotope analyser. The development and design was originally intended for space exploration, specifically for planetary landers. One potential use is a breath analyser to detect the early onset of sepsis in infants.
