

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

## About Trade 10

Trade10 is an innovative new procurement platform designed to streamline the electrical trade industry's buying process. By combining an extensive supplier database, competitive bidding technology and location-based stock tracking, it is a powerful tool that facilitates impressive cost and time reductions. The platform aims to improve the efficiency of the construction sector by reducing delivery delays and enabling more intelligent buying decisions to be made.
