

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

About Quickbird

At Quickbird, we build cutting-edge software that helps farmers make better decisions, boost farm profitability and improve staff productivity. This process is enhanced by the use of satellite EO data.
