

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

Archangel Imaging

AI eyes for land, sea and sky.

About Archangel Imaging

Archangel Imaging develops and deploys 'edge intelligence'.

Many of humanity's great challenges are in remote places with insufficient communications. We build integrated systems with the latest mini-GPUs, advanced cameras and our proprietary software. We fly, drive, float or place our AI technology for intelligent analysis in-situ.
