

The ESA Business Incubation Centre in Harwell, UK, started its operations in 2011 and is managed by the Science and Technology Facilities Council (STFC). It is located at Harwell Campus, a world leading science, technology and business campus based in South Oxfordshire with more than 4,500 researchers, engineers and innovators from over 150 high-tech organisations, and a focal point and cluster for the UK's rapidly growing high-tech space community.

About Anti Counterfeiting Technology Company

RealTag is a tech start up developing technology to help consumers avoid Card Not Present (CNP) fraud– simply by using a smartphone. RealTag’s team is developing a 3-D tag that is practically impossible to copy and can be individually read by every smartphone.
