About SpaceEXE

SpaceEXE Srl is an innovative start-up dedicated to creating products and services based on satellite navigation ranging from sports to the monitoring of landslides and infrastructure and smart mobility. The company produces miniature devices that send highly accurate real-time location and distance, with a focus on low cost solutions.

The challenge

WHEARE is a SpaceEXE solution for official football matches, able to send performance data (speed, acceleration and metabolic power) and tactical data (accurate position of athletes) in real time, through a miniaturized device inserted in the shin-guards. More Info in this link: <http://www.spaceexe.com/pagina3-inglese%20-%20Copy/inglese3.html>

The solution

GNSS (Global Navigation Satellite System). Thanks to the application of a sophisticated system, based on GPS, SpaceEXE analyse in real time the position and movements of a team, department or of each athlete in order to improving physical and tactical performances.
